

## BeJeweler® Pro Fact Sheet

The BeJeweler® provides a no-glue, no-tweezers and no-mess solution to crystallizing.

**Comfortable, precise and safe**  
**Used by professionals; available to everyone**  
**Premium quality**

**How it works...** CRYSTALLIZED™ – *Swarovski Elements* and other hot fix crystals have a heat sensitive backing; the BeJeweler® picks up each rhinestone, melts the glue and places the rhinestone exactly where you want it, providing the best possible adhesion. When applied correctly to porous surfaces and fabrics, washable items can be gently laundered.

**Ergonomic design – essential for your comfort and safety** - The handle of the BeJeweler® Pro is made out of thermoplastic rubber (TPR), which is a high quality material designed for softness, flexibility and durability.

**The BeJeweler® Pro is the only tool to have:**

- double insulation for your protection
- a matching cleaning brush included in the price that is essential to maintaining the integrity of the tool
- includes a support stand (although not essential as the BeJeweler® Pro is perfectly balanced)
- a design patent
- recommendation by Swarovski

**Professionals use and recommend this product**

The design of the BeJeweler® Pro allows greater control over the pick up and placement of the crystal. Try it! With the BeJeweler® Pro, you can keep your wrist on the table top and merely move your hand to pick and place the crystals.

**Uses for the BeJeweler® Pro**

The potential market for this product is immense; there are many uses for the BeJeweler® Pro

- Shoes, jeans, shirts, dresses - even velvet, spandex and fur!
- Costumes for theater, dance and ice skating
- Quilts and soft furnishings
- Handbags, purses and sunglasses
- Wedding gowns and accessories
- Home decor, candles, place mats, towels, wallpaper, candles, picture frames etc
- Wall hangings, wallpaper and paintings
- Hair bows, ribbons, clips & fascinators
